

Hearing Protection by Gateway Safety. Comfortable, reliable, affordable.

GloPlug® & Twisters® Earplugs

According to the National Institute for Occupational Safety and Health (NIOSH), noise-induced hearing loss is 100 percent preventable by wearing appropriate hearing protection. Once acquired, however, hearing loss is permanent and irreversible. Gateway Safety's earplug solutions, including both disposable and reusable options, are affordable hearing protectors that workers won't mind wearing.

Soft, comfortable and disposable, **GloPlugz®** earplugs offer serious protection at an affordable price. Their smooth, tapered design allows for incredibly easy insertion and their non-allergenic polyurethane formula is extraordinarily soft and comfortable. GloPlugz are independently tested to a 31 Noise Reduction Rating – one of the highest earplug NRR ratings available.

Twisters® earplugs are a longer-wearing, reusable earplug solution with a triple-flanged design and an air bubble tip to provide long-term comfort. Their soft, silicone material is easy to clean. Twisters are independently tested to a 25 Noise Reduction Rating.

Both GloPlugz and Twisters earplugs are available with or without a cord. And both will provide reliable hearing protection when it's needed the most.

GLOPLUGZ® Features

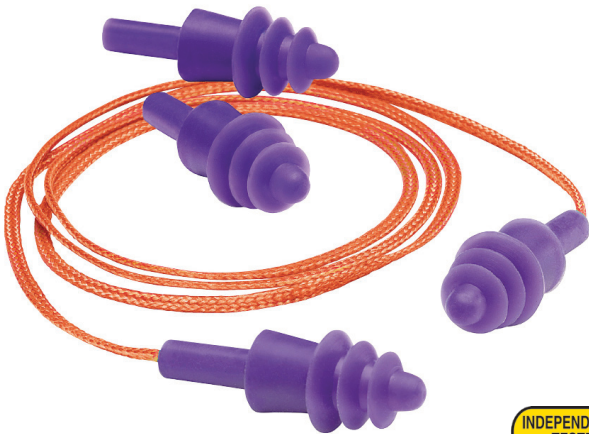

- Extremely smooth, tapered design allows for incredibly easy insertion.
- Non-allergenic polyurethane formula is extraordinarily soft and comfortable.
- Available with a glossy purple cord to make compliance checks easy.
- Independently tested to a 31 Noise Reduction Rating – one of the highest earplug NRR ratings available.
